

LABORATORY BILLING INFORMATION

Your physician has performed a procedure that will require the services of a pathologist. X-Cell Laboratories of Western New York, Inc. ("X-Cell") will be the provider of those services, and will process your specimen for interpretation by one of their Board Certified Pathologists. X-Cell is a local independent pathology laboratory that offers high quality, specialty-focused pathology services to many medical specialists and their patients. A laboratory report will be sent directly to your physician. The laboratory services performed will be billed to your insurance company by X-Cell. Below is a listing of many of the insurance companies that X-Cell has participating provider status with, and as such is considered an in-network laboratory by those carriers. In some cases, depending on the specific coverage limitations of your insurance policy, there may be a laboratory co-pay or co-insurance and/or a deductible amount that must be met. In these cases, you will be responsible for payment of the appropriate co-pay or co-insurance and/or the required deductible amount related to the services that are performed.

If you have any questions or need assistance with a bill, please contact the X-Cell billing office at (716) 250-9235.
